Work Experience

MyEdSpace

Nov 2023 - Current

Senior Full Stack Engineer

- Designed the architecture in AWS using services like RDS, Lambda, EC2, S3, DynamoDB, MongoDB, Postgres, and MySQL. Utilized Laravel Vapor in combination with Laravel Forge for deployment and setup CI/CD using GitHub Actions.
- Created a CMS using FilamentPHP and refactored large parts of the codebase to address technical debt and spaghetti code. Implemented an ad tracking system and developed APIs for automation.

Vacatia

Sep 2022 - Jul 2023

Senior Frontend Engineer

- Translated Figma designs into Tailwind CSS and Alpine.js
- Created accessible HTML designs following best practices and refactored the existing codebase to reduce tech. debt, and employed Twig Templating Engine for modularized design.

CODE LABX

Jan 2022 - Mar 2022

Full Stack Developer

- Led backend development and user functionality for a fintech website, utilizing key technologies such as Tailwind CSS, Alpine, Livewire, and Laravel.
- Facilitated the development of multiple dashboards and integrated various third-party packages and APIs, elevating website functionality and user experience.

BlessHost

Jul 2015 - Jun 2021

Full Stack Engineer

- Spearheaded the full-scale design and development of [BlessHost.com](https://blesshost.com), utilizing Next.js, React, Tailwind CSS, and Laravel/PHP, DevOps, focusing on frontend UI, internal applications, and API creation with serverless deployment.
- Engineered a comprehensive cart and order system featuring Stripe integration and automatic service delivery, along with designing PHP/Laravel APIs for user-focused features such as domain name availability and suggestions.
